Modelo 426

.177 cal BB (4.5 mm) Steel Airgun Shot
12gm CO2 Cylinder Only
.177 Cal BB (4.5 mm) Tir à Partir Pistolet A Air Comprime D'acier
Cylindre De CO2 De 12gm Uniquement
.177 (4.5 mm) BB calibre Bala de Acero para Arma de Aire
Unicamente cilindro de 12 g de CO2

WARNING:
- NOT A TOY. ADULT SUPERVISION REQUIRED. MISUSE OR CARELESS USE MAY CAUSE SERIOUS INJURY OR DEATH. MAY BE DANGEROUS UP TO 209 YARDS (191 METERS). THIS IS A HIGH POWER AIRGUN RECOMMENDED FOR USE BY THOSE 16 YEARS OF AGE OR OLDER. READ ALL INSTRUCTIONS BEFORE USING. THE PURCHASER AND USER SHOULD CONFORM TO ALL LAWS GOVERNING USE AND OWNERSHIP OF AIRGUNS.

WARNING:
- DO NOT BRANDISH OR DISPLAY THIS AIRGUN IN PUBLIC. IT MAY CONFUSE PEOPLE AND MAY BE A CRIME. POLICE AND OTHERS MAY THINK THIS AIRGUN IS A FIREARM. DO NOT CHANGE THE COLORATION AND MARKING TO MAKE IT LOOK MORE LIKE A FIREARM. THAT IS DANGEROUS AND MAY BE A CRIME.

WARNING:
- EVEN IF YOU FIRED THE AIRGUN ONE OR MORE TIMES AND NO BB IS EXPELLED, IT DOES NOT MEAN THAT THE GUN IS EMPTY OF BBS. CONTINUE TO TREAT THE AIRGUN AS IF IT IS LOADED.

WARNING:
- THIS GUN CAN CAUSE DEATH IF CARELESSLY USED OR MISUSED. READ AND FOLLOW THE INSTRUCTIONS CAREFULLY. DO NOT LOAD ANY BBs INTO THE GUN UNTIL YOU ARE READY TO SHOOT. IF YOU DO LOAD BBs INTO THE GUN AND THEN DECIDE NOT TO SHOOT, EITHER MANUALLY REMOVE THE BBs FROM THE GUN OR SHOOT THE REMAINING BBs AT A SAFE TARGET. AN UNLOADED, NON-PRESSURIZED GUN WHICH IS "ON" SAFETY IS SAFEST. ACCIDENTS HAPPEN FAST, AND ACCIDENTALLY INJURING OR KILLING SOMEONE IS A TERRIBLE THING. PLEASE SHOOT SAFELY.

NEVER STORE A LOADED GUN
At the end of a shooting session, as a safety precaution, always put the safety in the safety position - NO RED SHOWING, remove CO2 cylinder, remove BBs from the gun. Store in a safe place to prevent unauthorized use.

HOW TO OPERATE

WARNING:
- Be sure gun is always pointed in a safe direction. Never point the gun at anyone. Always assume and treat the gun as if it were loaded and ready to fire.

Step 1. PUT "ON" SAFETY - POSITION SAFETY SO NO RED IS SHOWING.
- Push the safety toward the "SAFE" position - NO RED SHOWING (Fig. 2). REMEMBER, THE BEST SAFETY IS GOOD GUN HANDLING.

Step 2. INSERT CO2 CYLINDER

WARNING:
- Use only CO2 cylinders which are the 12 gram type. Any attempt to use other sizes and/or cylinders containing other types of gas could be extremely dangerous. The use of gases other than CO2 could result in an explosion or could rupture the gun, causing serious injury.

1. Put "ON" safety - NO RED SHOWING.
2. Remove the butt of the grip by pulling down (Fig. 3).
3. Turn the screw clockwise to unlock the CO2 cylinder (Fig. 4).
4. Insert the small end of the CO2 cylinder into the grip. Hold the gun in an inverted position, and turn the pump until it is locked (Fig. 5).
5. Continue turning the screw RAPIDLY until finger tight. NOTE: A slight reepage of CO2 gas may occur until pump screw is tight.

WARNING:
- Be sure the muzzle is pointed in a safe direction when puncturing the CO2 cylinder. In the event that a seal temporarily leaks while the CO2 is being punctured, the CO2 gas may escape through the barrel. If ammunition is jammed in the barrel from prior shooting, this could result in a projectile being shot.

Step 3. FILL THE BUILT-IN MAGAZINE WITH A MAXIMUM OF 15 BBs

1. Always point gun in a safe direction. Insure that the gun is "ON" safe - NO RED SHOWING (see Operation Step 1).
2. Move the Built-in Magazine 18 follower fully forward and hold in position as shown. (Fig. 6)
3. Make sure the follower is held fully forward toward the muzzle of the gun and the spring is clear of the loading port before attempting to load BBs.
4. Once the Magazine is loaded, the follower is held fully forward, a maximum of 12.177 caliber BBs can be individually inserted into the Magazine Loading Port as shown. (Fig. 7)

WARNING:
- Use only Precision Max® BBs by Daisy®, or similar quality BBs that are labeled as such. Do not use lead pellets, buck shot, darts, ball bearings, or other foreign objects because they can cause injury to someone or may damage and/or jam the pistol.

CAUTION:
- When the built-in Magazine has been loaded with a maximum of 15 BBs, slowly remove the Built-in Magazine BB follower and allow it to rest up against the BBs. This will allow the BBs to be under spring tension (Fig. 8).
1. Always keep the muzzle pointed in a safe direction. There are several safe "zones" depending on the situation. NEVER ALLOW THE MUZZLE TO POINT IN THE DIRECTION OF A PERSON.

2. Treat every gun as if it were loaded. You can never be positive that you were the last person to handle the gun. Never leave anyone with a gun not reloaded.

3. Only load or unload a gun when you are shooting. A loaded gun has no place in your home or other public places.

4. Check your target and beyond your target. Be sure all persons are well clear of the target area before you shoot. Check behind and beyond your target to be certain there is no one behind the target. Unload the gun and return to safe area.

5. Anyone shooting near or under a shooter should wear shooting glasses. Also, all other persons should remain behind the shooter.

6. Never climb or jump with a gun. You cannot control the direction of the muzzle if you stumble or fall. You should safely lay the gun down or hold it in your arms while you climb or jump over any thing.

7. Avoid ricochet. Never shoot at a flat hard surface or at the surface of water. Ammunition can ricochet off of water just like a sloped bank.

8. Keep the muzzle clean. Never let anything obstruct the muzzle of a gun. Don't allow the muzzle to come in contact with the ground.

9. Guns not in use should always be unloaded. Keep your gun unloaded when not in use is critical to the safety of you and others. When you are finished shooting, put the trigger safety in the "on" position and unload the gun. Store guns so that they are inaccessible to unauthorized shooters and store ammunition separately from the gun.

10. Respect other people's property. Whether you're target shooting or hunting, if you're a guest on another's land, you should know exactly where you stand.

Visit www.daisy.com and read the shooting safety rules. Take a quiz and get your "Take Aim at Safety" Certificate.

11. WARNING: Once the built-in Magazine is loaded with BBs it is considered to be loaded, so use extreme caution in handling the gun. Keep the gun pointed in a safe direction. Never point the gun at anyone. Always treat the gun as if it were loaded and ready to fire.

Step 4. AIM AT A SAFE TARGET

To be a consistent marksmen, use the correct sight picture each time you fire the pistol (Fig. 9).

CAUTION: Due to the power of this CO2 pistol, use extra caution in selecting a safe target and proper backstop based on the ammunition you're shooting. Never shoot BBs into a steel trap designed for pellets. Pick targets and backdrops that will not cause a ricochet or allow the ammo to penetrate the backstop. Never shoot at a flat hard surface or at the surface of water.

Step 5. TAKE OFF SAFETY — RED SHOWING

When you are certain that the target, backstop and surrounding area are safe, position the safety "OFF" — RED SHOWING (Fig. 10).

WARNING: Use extreme caution in operating the gun because it is now ready to fire when the trigger is pulled.

Step 6. FIRE

The pistol can safely be fired after properly completing the operating steps mentioned above. After making sure the gun is in a safe direction, gently but firmly, squeeze the trigger. If you desire to continue shooting, the operation steps can be repeated until the CO2 cylinder requires replacement.

Step 7. PUT "ON" SAFETY — NO RED SHOWING.

After firing, return the safety to the "ON" position — NO RED SHOWING (Fig. 2).

BB DOES NOT FIRE

1. WARNING: If a BB does not fire after completing the operation steps, do not assume that the gun is unloaded. Keep the gun pointed in a safe direction.

CHECK THE FOLLOWING IF A BB DOES NOT FIRE

1. Did the built-in Magazine contain .177 cal. Daisy "Precision Maxx" or similar quality BBs? If not, fill the built-in Magazine with BBs and repeat the operation steps.

2. Was the safety "OFF" — RED SHOWING, when the trigger was pulled? If not, repeat the operation steps.

3. Was a CO2 cylinder installed? If not, put "ON" safety — NO RED SHOWING, and insert new CO2 cylinder. Repeat the operation steps after the new cylinder is installed.

4. Refer to the section on CO2 characteristics.

5. If the pistol still does not fire, refer to warning below.

WARNING: If the pistol still fails to shoot a projectile after checking the five items noted, there is a malfunction in the pistol. This could represent a dangerous condition. There could be a BB in the pistol even though a BB did not shoot. This could cause the user to mistakenly believe the pistol is unloaded. At no time should you look down the barrel of the gun. Put "ON" safe — NO RED SHOWING, remove the CO2 cylinder, and send the pistol directly to DAIY Manufacturing Service Department. Refer to section on REPAIR OF POWERLINE® Air Pistols.

HOW TO UNLOAD

After a satisfactory session is complete, the gun should be unloaded before storing it. To unload the gun always put "ON" Safe — NO RED SHOWING, remove the CO2 cylinder, and remove the BBs from the built-in Magazine.

CAUTION: Even though you have gone through an unloading procedure, continue to treat the gun as though it were loaded. Don't point at anything you don't intend to shoot. Always put the gun "ON" safe — NO RED SHOWING.

REMOVE CO2 CYLINDER

1. Put safety "ON" SAFE — NO RED SHOWING (Fig. 2).
2. With the bolt of the gun open, remove the CO₂ cylinder and remove all BBs from the pistol. Keep pistol away from children and unauthorized persons. Store ammunition, CO₂ cylinders, and the pistol separately from each other to prevent accidents.

3. **CAUTION**: A CO₂ cylinder contains gas under pressure, whether or not it has been inserted into a gun. If exposed to high temperatures (such as inside of a closed car in direct sunlight), it could explode. Be sure to store all cylinders in a cool place.

4. **WARNING**: A CO₂ cylinder contains gas under pressure, whether or not it has been inserted into a gun. If exposed to high temperatures (such as inside of a closed car in direct sunlight), it could explode. Be sure to store all cylinders in a cool place.

5. **PROPER CARE**: With care and periodic cleaning, your pistol will provide many years of shooting enjoyment. Be sure to keep your gun uncleaned and the elements will not affect the performance of any firearm. Learn to take care of your pistol and it will serve you well.

6. **CAUTION**: Never attempt to clean the pistol until it is "ON" safe — NO RED SHOWING. The CO₂ cylinder has been removed, and the BBs have been removed from the pistol.

7. **EXTERIOR PARTS**: Any plastic parts may be cleaned with a damp rag and mild soap or detergent. Avoid using strong detergents, abrasive cleaning compounds or solvents that may scratch or otherwise damage surfaces. The exposed metal parts should occasionally be wiped clean using a soft cloth that is lightly oiled with clean motor oil.

8. **LUBRICATION**: The CO₂ pistol was lubricated when built and should not require any additional lubrication.

9. **MODIFICATION**: The components of this gun were engineered to deliver optimum performance. Any modification or tampering with a gun may cause a malfunction and may make it unsafe to use. Any change in performance (such as a lowered trigger pull force and shortened trigger travel), indicates possible modification, tampering and/or wear. Such a gun should be inspected, replaced or properly repaired by qualified personnel. Any gun that has been dropped should be checked by qualified personnel to ensure that its function has not been affected.
REPAIR OF POWERLINE® AIR PISTOLS

WARNING: A pistol that is not operating properly may be dangerous. It should be kept safely from use by anyone until repaired or destroyed. Do not try to take the gun apart. It is difficult to reassemble, and improper reassembly can cause a hazardous condition.

GUNS IN WARRANTY

LIMITED ONE-YEAR WARRANTY. For one year from date of purchase, Daisy* will repair or replace and return this gun, free of charge, if defective in material or workmanship. Service is available by returning the gun to Daisy Outdoor Products (refer to Important Note below). Attach to the gun: your name, address, and telephone number, description of problem and proof of date of purchase. Package and send, transportation prepaid, to Daisy*. This Warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

IMPORTANT: You must return your defective pistol to Daisy Outdoor Products for repair via United Parcel Service (UPS). Be sure to put "OH safe" remove the CO2 cylinder and unluck all ammunition from the clip before returning the pistol to Daisy*. You must include your street address for Daisy* to send your pistol back to you through UPS delivery.

GUNS OUT OF WARRANTY

If your Daisy* gun needs repair, please call 1-800-713-2479 for repair charges. Daisy* will repair the gun or replace it with a reconditioned gun of the same model, if available, otherwise, with a model of equivalent quality.

Daisy* Outdoor Products, Service Department 108 West Stirling Drive, Rogers, AR 72756 USA

SPECIFICATION

ACTION
