Components and Parts

A. Hopper
B. Hopper Post
C. ON/OFF Switch
D. Battery Door

Preparing Gelbal Ammo

1. Before loading gelbal ammo, follow these steps:
   - Insert the container into the hopper and add enough water to cover ammo completely. The minimum recommended level varies depending on the type of ammo, filling to this level will result in properly expelled ammo that will function properly and minimize jams and jams.
   - Set the ammo to the hopper for four hours.
   - Drain all excess water.
   - To keep your gelbal Blaster hydrated long term, add water to your ammo container as needed.

Removing the Battery
