INSTRUCTION MANUAL

ATTENTION:
READ THIS INSTRUCTION MANUAL COMPLETELY.
This airgun is not a toy. Treat it with the same respect you
would a firearm. Always carefully follow the safety directions
in this instruction manual and keep this manual in a safe
place for future use.

WARNING:
Not a toy. Adult supervision required. Misuse or
careless use may cause serious injury or death. May be
dangerous up to 224 yards (205 meters).
This is a high powered airgun intended for use by those 16
years of age or older. Read all instructions before using. The
purchaser and user should conform to all laws governing use
and ownership of airguns.

SAFETY RULES

WARNING:
Before using your new Gamo CO2 pistol, you must
take the time to read and understand the following safety rules:
• Do not install a magazine which contains ammunition into the
gun until you are ready to shoot. If you do install a magazine
which contains ammunition into the gun and then decide not
to shoot, either manually remove the magazine from the gun
or shoot the remaining ammunition at a safe target.
• An unloaded, non-pressurized gun with an “ACTIVATED”
safety is safest.
• Accidents happen fast, and accidentally injuring or killing
someone is a terrible thing. Please shoot safely.
• Whenever you handle a GAMO pistol, make sure the safety is
“ACTIVATED” and there is no ammunition in the magazine.
• Always use eye protection.
• Always use hearing protection.
• Think first, shoot second.
• Always point the gun in a safe direction. Never point your air
pistol at people or animals even if it is not loaded.
• Always keep your fingers away from the trigger until you are
ready to shoot.
• Always be certain of what is behind your target. Make sure
your target does not conceal a person or some object which
could be harmed by the pellets.
• Do not shoot at targets which allow ricochets or deflections.

SAFETY RULES

• Do not shoot into or at water.
• Never use drugs or alcohol while handling this product.
• The air pistol and pellets / steel BB’s should be kept in
separate and secured places.
• Do not walk, run, jump or climb when carrying a loaded air
pistol. A loaded air pistol should never be carried inside a
vehicle.
• Never modify or alter your GAMO air pistol. Modification of the
pistol may cause it to malfunction and tampering with the gun
may make it unsafe.

WARNING:
Do not brandish or display the airgun in public, it may
confuse people and may be a crime. Police and others may think this
airgun is a firearm. Do not change the coloration and markings to make it
look more like a firearm. That is dangerous and may be a crime.

WARNING:
Do not use or carry the pistol in situations where it
could be mistaken for a firearm.

WARNING:
Do not show or display the CO2 pistol in public,
since it could be mistaken for a real firearm and regarded as an
offence. Do not change the colour or appearance of the CO2
pistol to look like a firearm. This is dangerous and may be
regarded as an offence.

WARNING:
This product is not a toy. Adult supervision is
required. Improper or careless use may cause serious injury.
May be dangerous up to a distance of 224 yards. This
compressed air pistol is recommended for users over 16. Read
the instruction manual before using this product. Buyer and
seller must comply with all specific laws for the use and
ownership of this compressed air pistol.

BASIC DESCRIPTION OF THE PISTOL

Safety mechanism

CO2 compartment

Weaver-style rail

Magazine catch

Magazine

Gamo Outdoor USA, Inc reserves the right to alter these specifications
without prior notice.

ENABLE/DISABLE MANUAL SAFETY MECHANISM

FIRE, Safety Mechanism OFF
Safety OFF: Pull the safety lever forward, towards the
letter ‘S’, leaving the red
warning mark visible.

SAFE, Safety Mechanism ON
Safety ON: Pull the safety lever backwards, towards the
letter ‘F’, covering the
red warning mark.

FITTING THE CO2 CYLINDER

Instructions
Remember: Whenever you handle a CO2 pistol, ensure the
safety mechanism is on, that there is no ammunition in the
barrel and that it is pointing towards a safe place.
1 - Remove the magazine and CO2 cover located below the
pistol grip, pulling it down and out.
2 - Carefully turn the screw that holds the cylinder in place
counter clockwise, leaving space to insert the CO2 capsule.
3 - Insert the CO2 capsule.
4 - Turn the screw clockwise to pierce the capsule with the
valve needle.
5 - Put the magazine and CO2 cover back sliding it up.

FITTING THE CO2 CYLINDER

WARNING:
Use only 12 gram CO2 cylinders. Any attempt to use
other types of gas cylinders could be extremely dangerous
and could result in serious injury or death. Gasses other than
CO2 could result in an explosion or rupture the airgun.

WARNING:
Keep hands and face away from the CO2 cylinder.
Escaping CO2 gas can cause frostbite if allowed to come in
contact with skin.
**WARNING** If you are not going to use the pistol for a long period of time, we recommend removing the CO2 bottle. When replacing the CO2 bottle, it is important to make sure that all residual gas is left. In order to avoid accidents, make sure that the gun is unloaded and the safety is "ACTIVATED" when removing or placing a CO2 bottle. Never force to insert a CO2 bottle.

**WARNING** Keep the CO2 bottles away from heat and flames. Temperatures over 60°C (140°F) can cause explosion and injury. Never throw a CO2 bottle into a fire.

**WARNING** Always wear eye protection when handling CO2 bottles, since there is a risk of injury to the eyes. Do not remove a CO2 bottle until it is completely empty. Failure to observe this recommendation can result in a dangerous escape of residual gas.

**FILLING THE MAGAZINE**

1. Press the button in the lateral of the grip panel
2. Remove the magazine
3. Take the magazine and fill it with pellets.
4. Capacity for 8 shot rotary clip x 2, 16 pellets or steel BB’s.
5. Insert the magazine loaded with pellets or BBs.

**WARNING** Only use pellets and/or steel BB’s that are in perfect condition. Ensure you use the correct caliber in order to prevent damage to your CO2 pistol.

**WARNING** When preparing to store the pistol, point the barrel at the ground and make sure that the magazine is empty and that there are no pellets and/or steel BB’s in the barrel. In this way you will avoid possible accidents when using the pistol again.

**WARNING** When there is an obstruction in the barrel, never shoot another pellet or steel BB. Always make sure that the Safety is activated before clearing an obstruction.

**CAUTION** Make sure that the Safety is activated and the CO2 bottle has been removed before proceeding with the removal of ammunition. Before removing the CO2 bottle, make sure that it is empty of CO2.

**AIMING AND FIRING**

- Front sight
- Rear sight
- Trigger
- Safety sight
- Safety mechanism

**AIMING**

1. Release the safety mechanism
2. Pull the trigger

**FIRING**

1. Release the safety mechanism
2. Pull the trigger

**USE AND HANDLING OF CO2 CYLINDERS:**

It is possible that certain conditions may affect a CO2 cylinder, which can impact its proper performance. These conditions include the storage and maintenance of the CO2 bottle at temperatures that are higher or lower than normal outdoor temperatures (59°F/15°C to 68.9°F/21°C). Another condition may be when the gun is fired rapidly. High temperatures can increase pressure in the CO2 cylinder and also within the gun, leading to higher than standard operating pressure. This excess pressure could cause the gun to malfunction and/or be permanently damaged. Maximum storage or operation temperature should never exceed 122°F (50°C). This temperature can be reached if you leave the gun under direct sunlight on a bright day.

Thus, to ensure proper gun operation, do not expose it to high temperatures or direct sunlight for extended periods of time. Otherwise, the CO2 cylinder could overheat and explode, which may cause damage to the gun and cause injuries or death to people around it.

2. Fast consecutive shooting may quench the CO2 inside the gun and could affect the performance of the gun. This condition can be especially apparent when shooting in cold weather and can be avoided by allowing more time between shots. This permits the gas to increase in temperature and pressure and produce normal velocities.

3. During rapid fire, the muzzle velocity of each shot will diminish. This can affect shooting accuracy and you will get fewer shots per CO2 cylinder.

4. Care should be exercised to ensure that the gun is not shot with a CO2 Cylinder that is low in pressure. Here are some indicators of insufficient pressure:
   a. The sound of the shot is not as loud as when the cylinder is full.
   b. The projectile hits the target, but in a lower position than it would with a full CO2 cylinder (that is, the shooting speed has dropped).

**CARE**

**Repairs**

A compressed air pistol that is not functioning well can be dangerous. Do not attempt to repair the gun yourself, as this may cause abnormalities in its functioning. Use a 4.5mm calibre cleaning rod (.177 in) if a pellet and/or steel BB’s have become blocked in the barrel. Take your gun to approved gunsmiths or to professional repair specialists approved for this type of product.

**Cleaning**

Before cleaning the barrel of the pistol, ensure it is not loaded and that its safety mechanism is on. To clean the barrel of the pistol, take out the CO2 cylinder, remove the magazine and use a cleaning rod for 4.5mm (.177mm) calibre, patch-covered jag and brush. Insert the cleaning rod from the muzzle. Remember lubricating oil should never be used on the barrel. From time to time, it is advisable to apply some special GAMO oil to the metal parts, to prevent rusting.

**Storage**

CO2 pistols should be stored so that they are protected from unsupervised use by children. Always store the pistol in a clean, dry place. We recommend storing the pistol in an anti-corrosion box or case. Before storing the airgun, make sure the safety is "ACTIVATED", airgun is unloaded, and the CO2 is removed. CO2 pistols should be stored in such a manner as to protect against unauthorized use by children and others. These products are designed to look, handle and function like pistols. These products should be stored in such a manner to protect against theft and subsequent misuse.

**ONE (1) YEAR LIMITED WARRANTY**

GAMO warrants this product to be free of original defects in material and workmanship for one (1) year. This warranty applies only to products purchased in the USA. At its option, GAMO will repair or replace this product without charge for parts and labor, providing our inspection indicates that an original defect exists. Should GAMO choose to replace the product, and the product is no longer available at the time warranty service is required, a substitution of similar performance and equal or greater value will be made. This warranty does not include damage caused by abuse, unauthorized repair or modification of any kind. There are no warranties that extend beyond the description on the face hereof. GAMO makes no implied warranty of merchantability or implied warranty of fitness (for a particular purpose). Some states do not allow limitations of implied warranty, so this limitation may not apply to you. In that event, any such implied warranty is limited to that required by law. GAMO shall not be liable for incidental or consequential damages, including but not limited to lost profits or other economic or commercial losses. The sole remedy provided in this warranty is repair or replacement of the product. To activate this warranty you must mail within 60 days the enclosed GAMO warranty card to:

GAMO OUTDOOR USA, Inc.
1700 S 2nd St, Rogers, AR 72756
Phone (800) 713-2479  E-Mail: info@gamousa.com

Include with your product a note explaining the nature of the problem and be sure to include your name, address, and telephone number. Also include a check or money order in the amount of $10.00 to cover postage and handling. In the event of a non-warranty repair, you will receive an estimate prior to any work being done. This warranty gives you specific legal rights and you may have other rights which vary from state to state. As defined by federal law, this is a limited warranty.
